Current Product Audits and Analysis

Oct 25, 2026 · @Designer Nesil Noble

This doc is the single index of every reference for the GSP 3.0 redesign: what each one is, where it lives, and what the PM's clickable prototype contains. It is written so that a person or Claude Code can find any reference from here.

1. All references and links

Reference	What it is	Link
GSP 3.0: Designer Brief	The source brief: business, roles, processes, design rules, phases. Owned by another organisation; share it with this account to open it	claude.ai/artifact/EZ94wHWNWRbNuW1haiEmNx
upGrad GSP: The Brief, Explained Simply	The brief retold in plain words, with the 20-step journey and UI impact per step	claude.ai/artifact/NFw9wdVDciuh1ZphWwgrL1
What Our Agents Told Us (field report)	28 agency sessions in 10 markets, 4 competitor portals, 89 screenshots, root causes and roadmap	claude.ai/artifact/84CqNHuX5GvTvtsqJBvymF
What Our Agents Told Us: Explained Simply	The field report retold, with today's portal and competitor screenshots	claude.ai/artifact/4SPv6Pvv8b6fdWitjmDukF

Reference	What it is	Link
GSP Partner Portal (PM prototype, copy)	Clickable prototype of GSP 3.0 with 14 logins. Behaviour reference only, not a design reference	claude.ai/artifact/N48JtRBf3QFjEbRKK7qZXh
GSP Partner Portal (original, from the brief)	The prototype link named in the brief. Not opened here; the copy above is the one reviewed	claude.ai/artifact/BNDsncXPswe5ewMnQ9mGTF
upGrad brand guidelines	Brand colours, type and usage	wordpress-387988-6723665.cloudwaysapps.com
upGrad GSP public website	The current marketing site	upgradgsp.com

2. The PM prototype: what it is and how to use it

The prototype is a single web page that acts out GSP 3.0 for every role, with sample data that saves as you click. Use it to understand behaviour, flows and rules; its colours, type and layout are placeholders, not the design.

How it works

- One self-contained HTML file (about 580 KB), with all screens, logic and sample data inside it.
- A **"Viewing as"** menu at the bottom of the left sidebar switches between 14 logins. Data you create is saved, so a flow can be walked end to end (apply as an agency, then check and submit as Admissions).
- Sample date is 23 Oct 2026. Search covers Australia, the UK and New Zealand. Figures marked "sample" are made up.
- Owner colours follow the brief: amber for the agency ("Needs you"), violet for GSP, blue for the university.
- An **"Ask GSP"** button sits on every agency screen, and a bell shows notifications.

The 14 logins

Login	Side	Left menu
RP admin · Ananya, Horizon Overseas (India)	Agency	Home, Applications, Students, Find courses, Earnings, Profile
Branch admin · Vikram, Horizon Pune (India)	Agency	Same menu, scoped to the branch
Counsellor · Rahul, Horizon Lucknow (India)	Agency	Same menu, scoped to own students
RP admin · Lan, Saigon Bridge (Vietnam)	Agency	Same as Ananya, Vietnam data
Branch admin · Minh, Saigon Bridge Hanoi (Vietnam)	Agency	Same as Vikram, Vietnam data
New agency signing up	Agency	Join GSP
Admissions: India	GSP	My queues
IP team	GSP	Institution partners, Universities, Courses
BAP (agency checks)	GSP	Agencies
Data team (courses)	GSP	Held changes, Courses, Universities
Commissions & Finance	GSP	Commissions, Rules, Payouts
Recruitment manager	GSP	My partners, Onboarding
Super admin	GSP	Users and roles, Onboarding settings, Destination workflows
Leadership (Deepesh)	GSP	Overview

3. Screens and features, role by role

The prototype has about 30 screens. Below is what each one shows and lets you do, as seen on 25 Oct 2026.

Agency (RP admin, branch admin, counsellor)

Screen	What it shows and does
Home	Count of things to do and live applications. Quick actions: new application, add student, find a course. Commission tiles: next payout, expected from enrolments, in pipeline, paid this year. Pipeline by stage with "needs you" counts, filterable by destination and intake. **Your tasks**: everything waiting on the team, soonest first, with Upload / Add details buttons; the same list goes to WhatsApp each morning. **Your GSP team**: BDM and Admissions contact with phone, email, Call and WhatsApp. **Deadlines and updates** feed from GSP
Applications	Tiles: All, Needs you, With GSP, With university, Offers, Visa, Enrolled, Closed. Search by student, passport, application ID, university reference or course; filters; Download. Table: application, student, university and course, intake, destination, counsellor, status (owner colour + plain words), time at this step with the usual time ("2 days · usually 13"), Act / View
Application detail	Header: student, course, university, intake, owner. Facts: application ID, university reference, counsellor, GSP contact, "You earn". 8-stage tracker. **Needs you** box with the one action (e.g. "Re-upload Passport · Upload now"). Tabs: **Summary** (key details, GSP contact with phone and email, how they were assigned), **Documents** (requested now with reason, documents so far, "From the student record"), **Chat** (thread with the GSP contact, attach files), **Activity** (every change: when, what, by whom, filter by You / GSP / University / System)
New application	Opens from Applications or Home: pick a student and a course

Screen	What it shows and does
Students	Filters: complete or incomplete profile, number of applications, counsellor. Table: student, contact, counsellor (reassignable), profile status, applications
Student detail	**Student link** so the student fills their own profile. Course matches ("106 eligible now · 1 more with conditions"). Sections: Personal, Academics, Work experience, Tests, Documents, Applications, each with what's still needed. Passport on file with details read from it and "Verified by GSP". Saves as you go
Find courses	Search for a student or none; with a student, country and state fill from the profile. Five required fields (destination, student's country, state, level, area). **Student view** switch hides earnings. Course cards, compare and shortlist
Earnings	Headline "AUD 12,810 on the way". Tiles: Expected, Confirmed, Invoiced, Paid, Clawed back. **Tier progress** ("3 more enrolments to reach 75%", backdated). **Your rates** table per university (GSP earns, you get 70%). By student: status, when, amount, invoice number
Profile	Business details (editable), bank details per country with proof document (cancelled cheque in India, bank letter in Vietnam), documents, team and branches, contacts
Join GSP (new agency)	One-page sign-up: name, business, country, state, city, email with code, phone. Then the agency's own portal: Home, Documents, Profile, Find courses, Team, with the status "Fully active and earning commission" once done

GSP teams

Screen	What it shows and does
Admissions: My queues	"10 items need a decision", scope India, items done today and minutes per item. Seven queues: **Check and submit** (submit through portal and save reference), **Decisions to record**, **Flagged documents** (e.g. passport code unreadable, transcript total doesn't match marksheets: Ask for re-upload / Verify), **Check and send** (submission email or GS pack ready: Edit / Send), **Verification** (bank didn't reply: Email again / Clear manually), **Emails to action** (best matches with % confidence: Place on application), **Outcomes to confirm** (proposed Rejected, read from email: Correct / Confirm). "Open as the RP" shows the agency's view
IP team: Institution partners	Tiles: Active, In set-up, Negotiating, Renewal due within 60 days. Filters by type, status, relationship manager. Table: partner, type, universities, RM, agreement end, status
Institution partner detail	Status tracker: Negotiating → Reading agreement → Confirm fields → Set-up → Active. Tabs: Overview, Universities, Agreement, Commission, Contacts, Changes. End partnership
Universities	Filters by status, country, partner. Table: university, partner, campuses, courses, status
University detail	"Live: 13 courses are in search", Pause. Tabs: Overview, Campuses, Courses, Who can apply, Submission and contacts, Changes. Profile fields, **feature tags** shown in search (post-study work visa, conditional offers, scholarships, Group of Eight…), and **typical offer time** worked out from GSP applications

Screen	What it shows and does
Courses	Filters by university, destination, level, status (Draft, Needs check, Live, Hidden). Table: course, tuition a year, next intake, entry needs, data source and date, status. Every change logged
Data team: Held changes	Tiles: 18,240 live courses at 1,040 universities, 92% checked in 30 days, held for you, bot accuracy 98.6%. Each held change shows why it was held (fee up over 10%, intake in the past, new campus, found only in an email), old → new, and the source: Reject / Approve and publish. Log of changes published automatically
BAP: Agencies	Tiles: Waiting for BAP, Not activated, Sent back, Not signed yet, Agreement signed. Filters by status, country, BDM. Each agency shows flags and missing documents
BAP: Agency detail	Review each document, Reject / Send back / Activate. **Check results** (e.g. registration number matches a rejected agency, same email domain). Timeline, details, and GSP mapping: BDM, Admissions contact, Master Partner
Finance: Commissions	Tiles: Ready to invoice, Invoiced awaiting payment, Paid to GSP this month, RP payouts this week. **Exceptions**: enrolment not confirmed, claim mismatch, quality review, payout hold, each with its two actions. Lines by status
Finance: Rules	Every amount comes from a dated rule with its source clause; the person who drafts a rule can't activate it. Rules to activate (drafted by the system from a variation letter), RP share rules in force (70% base, tiers 75% and 80%, special 100% rules, Master Partner)
Finance: Payouts	One weekly batch, self-billed invoices, 7 days to dispute. Approve batch

Screen	What it shows and does
Recruitment manager: My partners	Region and mapped agencies. Applications this month, partners applying, need attention. Table with change vs last month and status (Active, Dropping, Onboarding, Dormant) and nudges: "Ask what's slowing them", "Chase onboarding", "Win back"
Recruitment manager: Onboarding	The BAP agency list, filtered to the manager's agencies
Super admin: Users and roles	Each person: one role and one scope (region or global). Add or remove users
Super admin: Onboarding settings	Assignment rules by country and city (referral code wins) for BDM and Admissions contact; documents each country needs at sign-up
Super admin: Destination workflows	Per destination, switch steps on or off: assessment, pre-visa approval, deposit, enrolment document name, who requests it
Leadership: Overview	Applications this month, Admissions minutes per application vs target, items waiting on GSP over 48 hours, % of questions answered by the assistant. Funnel from created to enrolled, where applications wait (with agencies, GSP, universities) with medians, longest with GSP, and a table by region

4. What the prototype covers, and what looks missing

The prototype covers most of the brief and already answers several asks from the field report; the gaps below are what I couldn't find in it. It is a quick review, so treat "not found" as "to check with the PM", not "missing for sure".

Field-report asks the prototype already answers

Field-report ask	Where it is in the prototype
Commission rates visible to agency admins	Earnings: "Your rates" per university, plus tier progress
A named contact with a phone number	Home: "Your GSP team"; application Summary: GSP contact with phone and email
A task list across all applications	Home: "Your tasks", also sent to WhatsApp each morning
Turnaround shown to the agency	Applications: time at this step with the usual time; university: typical offer time
Pipeline view and export	Home: pipeline by stage; Applications: Download
University emails placed on the application	Admissions: "Emails to action" with match confidence
Upload once, reuse	Application Documents: "From the student record"
Course data freshness	Courses: data source and date; Data team: held changes and bot accuracy
Updates from GSP	Home: "Deadlines and updates" feed

Not found in the prototype

- **Roles from the brief with no login:** Recruitment head, Admissions head (workload, reassign, release on-hold, override status), and Master Partner.
- **A role name mismatch:** Users and roles lists "Platform ops" but no separate BAP or Data team role, while the login menu has both as separate personas.
- **Agency agreement signing:** the step from Activated to Agreement signed isn't clearly shown.
- **IP agreement reading:** the statuses exist (Reading agreement, Confirm fields), but the AI review screen wasn't found.
- **Document templates and validity dates,** and reminders for missing documents.
- **Training hub** for agencies.
- **Second applications:** a duplicate-student check wasn't found.

- **Payout receipts** attached to each payment.
- **Alerts when an application is declined after enrolment.**
- **Fuzzy search** for renamed universities wasn't tested.
- **Mobile layout:** only checked on a desktop-size screen.

Extras not in the brief

- A **Leadership overview** with funnel, waiting times and per-region figures.
- **Destination workflows** and **Onboarding settings** screens for Super admin.
- A **referral code** at sign-up that decides the BDM.

5. Today's portal: UX audit of the legacy staging portal

Today's portal can take about 80 interactions and 27 required fields to start one application, and no screen says who needs to act next. This is the Claude in Chrome audit of https://stage-legacy-gsp-portal.upgrad.dev/ on 25 Oct 2026.

Login used: GSP Staff with the Admin role, not an agency. The agency view still needs its own audit with an agency admin and a counsellor login.

Test data created: student "Test Student QA" (GSP ID 128811), enrolment E00102511, application A00175348 (Abertay University, BA (Hons) in Computer Arts), one dummy PDF, one private case note. Nothing deleted or sent.

5.1 Navigation map

Home tile	Page title it opens	Address
Course Search	Course search	`/course/search`
My Students	Students	`/manage-students`
My Enrolments	Enrolments	`/manage-enrolments`
My Applications	Applications	`/manage-enrolment-course`
My Commission	"MY TRANSACTIONS"	`/manage-commission-transaction`
Institutions	"INSTITUTION LIST"	`/manage-institutions`
Channel Partners	"RECRUITMENT PARTNERS LIST"	`/recruitment-partners`

Home tile	Page title it opens	Address
My To Do	"MY CASE"	`/case`
My Inbox	Shared email inbox	`/emails`
My Events	Week calendar	`/my-events`
Dashboard	Staff reports	`/dashboard`
GSP Academy	External training site	academy2.globalstudypartners.com
Accommodation	Embedded housing search	`/accommodation`
Health Cover	Insurance quote (OSHC)	`/oshc/get-quote`
Internships	External marketing page	globalstudypartners.com

- **Header on every page:** "?" Help (Contact Admission, Contact Commission, Contact System Admin); gear with admin settings (Announcements Management, Assessment Criteria, Budget List, Contact List, Institution Commission %, Institution Partners, Master Partners, OSHC Policies, RP Branches, System Admin, Update Courses); megaphone for announcements; bell for notifications; avatar (Update Profile Image, My Profile, Logout).
- **Reached only through flows:** course search results (`/course/course-search-result` , with card, map and checklist views), the Enrolment Wizard (`/enrolment-wizard/`), and records for student (`/manage-students/view/{id}`), enrolment (`/manage-enrolments/view/{E-id}`), application (`/manage-enrolment-course/view/{A-id}`), case (`/case/view/{C-id}`), commission transaction, institution and partner.

5.2 Page by page

Page	What it does	Main problems
Home	15 icon tiles that open each module	Nothing to act on: no counts, tasks or recent items; tile names don't match page names; two tiles leave the portal without warning

Page	What it does	Main problems
My Profile	Own details, email group, Outlook calendar, signature, alert emails, announcement settings	Labels break mid-word; the only alert email is not "Active", unexplained
Course Search	17 optional inputs (2 free-text boxes, countries, state, city, institution, sector, level, area, English test and score, fees, availability dates, duration). "Search Courses" opens an in-between screen ("We have 10,000 Courses from 857 Institutions"), then results	Button below the fold; Enter doesn't search; "View search result" greyed out with no reason; partial text works but typos fail; duration slider has no clear effect
Search results	Rows with heart, logo, course, duration, IELTS/PTE/TOEFL/CAE bubbles, scholarship/bridging/internship ticks, course, annual and application fees, intakes. Filter panel, sort, card, map and checklist views	"Institution not found for the selected Course !!" on every load; course name not clickable; hearts do nothing; "$" shows "No matched commission item"; campus icon does nothing; currency shown three ways; India-campus courses have no intakes; map fails to load
Course detail (card view)	Carousel of cards: "Why study here?", overview, schedules, recognition, careers, other fees; "Checklist", "View in Institution", "Apply Now"	Encoding errors in text; no "last updated" date (last StudyLink import 29 Jun 2026)
Assessment Checklist	Academic, English, Financial tabs of long free text	Eligibility never checked against the student; territory not flagged here
Enrolment Wizard	4 steps: Student, Enrolment, Application, Documents (details in 5.3)	Long forms, late territory warning, no document checklist

Page	What it does	Main problems
Enrolment record	Header card, 9-stage tracker (New, Pre-Screening, Application, Offer, Verification, Acceptance, Visa, Enrolling, Enrolled), tabs for Enrolment, Documents, History, Cases, Commission, Events, Applications, Student, Notes, Announcements; milestone dates	Nothing says what's missing or who acts next; "Pre-Screening" vs "Incomplete" unexplained; tabs cut off on a laptop; no document expiry; history uses opaque IDs
Application record	Tracker; stage, status, type, preference, CoE/CAS ID, dates, admission officer, StudyLink IDs; "ASSESSMENT REQUIREMENT" with "RP To Do : 0%" and "GSP To Do : 0%"; watchers	"Territory NOT ALLOWED" stored in the External Reference field; rule items not linked to uploads; stage and status locked; nothing shows if the university has it
Case record	Internal work item: owner, stage, status, type, queue, priority, notes with 28 categories, tasks, email	Developer text shown to users; notes have no replies or threads; two different empty-state wordings
My Students	84,092 students as large cards; keyword and advanced search	~8 s to load; no status; names not clickable; 5 cards per screen; no export
My Enrolments	Status tabs ("9228 In Process", "10788 Acceptance", "8292 Commenced", "70002 Not Proceeding"); cards with tracker and primary/additional badge; list view	List view drops tabs and changes totals and sort; very wide grid; no export
My Applications	155,235 applications in a wide grid	New application not findable by ID or name; no status tabs; no export

Page	What it does	Main problems
My Commission	Tabs Estimate, In Process, Paid; transaction items and transactions	No amount in the list; "Agency Charge", "SRP" unexplained; 70% with no base rate; course shown as an internal ID; no invoice; two date formats
Institutions	1,013 cards; record with Performance pivot and Territory Rules	Counts disagree (24 vs 26); territory checkboxes unlabelled
Channel Partners	6,166 agencies with onboarding tracker; record with Commission %, Tier, branches, call notes	
My To Do ("MY CASE")	746 cases, mostly "Not Started"	No due dates, no "assigned to me", no urgency sort
My Inbox	Shared mailbox of 2,423 emails	Everything "New", no case linked; icon-only tools
My Events	Week calendar	Weekend cut off; no empty state
Dashboard	Staff BI: adoption monitor and ~230 saved reports	No agency pipeline or task list; overlapping chart labels
Accommodation, Health Cover	Embedded housing search; OSHC quote (Australia only)	Different look; not linked to a student
Admin settings	Announcements, criteria, budgets, contacts, commission items, partners, master partners, OSHC, branches, course sync	"System Admin" opens a blank page
Notifications and help	Bell, announcements, "Contact Admission" form	Bell shows 1 of 13; announcements never load; Contact Admission has no subject or student link

5.3 Main flows

Find a course, about 8 interactions: open search → type university → type course → scroll and click "Search Courses" → "View search result" → dismiss the error → card view → "Checklist".

Create student, enrolment, application, document, about 80 interactions:

Step	Required fields	Interactions	Notes
"Apply Now", "Add New Student"	–	2	
New student form	18 of ~44	~46	Name, email, agency, branch, counsellor, date of birth (picker only, 7 clicks), mobile, marital status, visa refusals, two addresses, emergency contact
Enrolment details	7 (4 prefilled)	~11	Current country, at destination, commencement year and month (not limited to intakes), academic and English scores (no validation)
Application	2	~12	Territory warning ("6-8 weeks"); free date picker; 6 application types
Documents	Category and sub category per file	~6	No checklist; `.exe` accepted; "Verify Document" asks for a student Live Capture
Pop-ups	–	4	No confirmation after creating the student

Upload a document later: enrolment record → Documents → kebab → "Add Record". Documents belong to the enrolment, not the student.

Check status: My Enrolments cards or My Applications grid; stage only, no next action or owner.

See commission, about 4 clicks: My Commission → tab → transaction item → transaction for "Commission %".

5.4 Top 15 UX problems

1. Nothing says who must act next, what's missing, or whether the university has the application.
2. New applications can't be found in My Applications.
3. The student form is long and slow (18 required of ~44; date of birth can't be typed).
4. Territory problems appear only after the student and enrolment exist.
5. Course search: no typo tolerance, 17 inputs, no Enter, extra step, unexplained disabled button.
6. An error on every results load.
7. No document checklist, internal categories, no templates or expiry.
8. Eligibility is free text, never checked against the student.
9. Commission is hard to read: no amount, unexplained terms, no invoice.
10. Course data age is hidden (last import 29 Jun 2026).
11. Menu names don't match page names.
12. Communication is scattered: notes without replies, unlinked Contact Admission, shared inbox, notifications missing.
13. Inconsistent currency, dates, empty states and counts.
14. Lists are hard to scan; no status on students; no export.
15. Weak validation lets bad data in ("abc99" scores, `.exe` files, unanswered questions saved as Yes).

5.5 Broken during the audit

#	What was done	What happened
1	Loaded search results	"Institution not found for the selected Course !!" every time
2	Clicked "Campus Info"	Nothing
3	Clicked "$" on a result	"No matched commission item"
4	Clicked the shortlist heart	Count stayed 0

#	What was done	What happened
5	Opened map view	Google Maps failed (possibly a staging key)
6	Searched for the new application	"No Record Found"
7	Skipped the work question	Saved as "Yes"
8	Typed "abc99" as a score	Saved
9	Created one application	"Successful Created Multiple Applications." and "Failed to create Estimate Commission"
10	Opened notifications	Badge 12, list empty; later 1 of 13
11	Opened System Admin	Blank page
12	Uploaded a document	Status text overlaps the file name
13	Viewed an enrolment on a laptop	Tabs hidden or cut off
14	Opened a case	Developer text shown
15	Typed a date of birth	Ignored; picker only

5.6 Keep from today's portal

The stage tracker; status tabs with counts; the guided wizard idea with prefilled course details; the plain-language territory warning with its time cost (moved into search); the "RP To Do" vs "GSP To Do" split; field errors that name the field; searchable dropdowns and "Same as current" address; document preview and "Download All Documents"; watchers; rich course content; the institution Performance pivot; single-column mobile records.

5.7 In today's portal but not in the brief: decide keep, change or drop

- Application types (Package Start, Package Progress, Package End, Pathway, Unique) and student types (New, Progression, Transfer).
- A ninth stage, "Enrolling", between Visa and Enrolled.
- Live Capture: a live photo of the student to verify documents.
- Accommodation, Health Cover (OSHC), Internships and GSP Academy.

- Watchers, Events calendar, Announcements, Outlook and email-signature settings.
- Admin tools: assessment criteria, budgets, contacts, commission items, master partners, course sync.
- Application questions such as recognition of prior learning and transfers between Australian providers.

Scale in staging: 84,092 students, 87,502 enrolments, 155,235 applications, 6,166 agencies, 1,013 institutions, 746 open cases.

6. BOA - Recruitment Partner Audit

An agency's real to-do list already exists in today's portal, but it is hidden three clicks deep in the Dashboard, while "My To Do" shows the wrong list. This is the Claude in Chrome audit of the same staging portal, logged in as an agency branch admin, on 25 Oct 2026. Screens that behave as in section 5 are only described where they differ.

Login used: "Jovial Unilink" (jovial.lejo+BOA@upgrad.com), User Type "Recruitment Partner", Permission Role "Branch Admin", Job Title "BOA". Agency "Unilink Global Solution", branch "Dhaka Office", BDM "Tokee Tahmid".

Test data created: student 128812 "Test Student BOA QA" (fake passport TESTQA0001), enrolment E00102512, application A00175349 (Abertay University, BA (Hons) Accounting and Finance), one dummy PDF, one enrolment note. Nothing deleted or sent.

6.1 What an agency sees compared with GSP staff

Area	GSP admin (section 5)	Agency branch admin
Data	All agencies (84,092 students)	Own agency only (440 students, 858 applications)
Home	15 tiles	The same 15 tiles and links
Settings (gear)	11 admin pages	"Contact List" and "OSHC Policies" only
My Profile	4 tabs	Plus a fifth tab, "Student QR"
Enrolments menu	Add, Assign BDM, Delete, Sort, Advanced Search	Delete (disabled), Sort, Advanced Search

Area	GSP admin (section 5)	Agency branch admin
Institutions list	App counts and commission %	Neither; only study-level labels
Dashboards	About 230 staff reports	"RP - Awaiting Action", "RP Pipeline", "Test ui"
Notes "Private" checkbox	Available	Disabled
"Institution not found…" error in search	Every time	Didn't appear

6.2 Page by page (differences from section 5)

Page	What the agency sees	Problems
Home	Same 15 tiles; agency logo in the header (does nothing)	No counts or tasks; the real to-do lists are hidden in the Dashboard
My Profile → "Student QR"	A "Student Registration QR Code" with Copy and Download, so students can register themselves	Fifth tab, cut off on a laptop screen; nothing explains what happens after a scan
Course Search	Same 17-input form; "Where is the student?" prefilled with "Bangladesh", and it comes back after "Refine search"	**Courses are silently hidden by territory:** "Abertay" found nothing with Bangladesh set, but 183 courses after clearing it. Clearing it lets the agency apply to a restricted course and find out only in the wizard. Hearts and "Apply" don't work; "$" shows "No matched commission item"

Page	What the agency sees	Problems
Enrolment Wizard: student	Same 44-field form, 18 required; only this agency's students in the picker (with duplicates such as "Abdul Aual Shakib" twice)	Recruitment Partner and RP Branch not prefilled although each has one option; counsellor listed twice; date of birth 7 clicks; **expired passport accepted**; dropdown search keeps old text ("BangladeshBangla" → "No Record Found"); no confirmation
Enrolment Wizard: enrolment	Same 21-field form	Year prefilled to the wrong year
Enrolment Wizard: application	Same territory warning and "Territory NOT ALLOWED"	"Confirm & Create" greyed out until date and type are set through an edit pencil, with no hint; the agency sees "Failed to create Estimate Commission. We have informed GSP Commmisson Team."
Enrolment Wizard: documents	Same drop zone and "Verify Document"	Internal categories such as "Commission", "Income", "Fund"; no checklist
Enrolment record	Same layout and 9-stage tracker; watch, **delete** and edit icons visible	The agency sees internal cases, including a "Error Creating Commission" case **owned by the agency user** but queued to "Commission Team", with internal text. Notes: 22 categories, "Private" disabled, "Mention" lists every GSP user alphabetically with no role; no replies

Page	What the agency sees	Problems
Older enrolment (E00094724)	Status "COE Issued", tracker at Visa, dates stop Oct 2024	Its VISA case says **"Case Status: Awaiting RP"** since Oct 2024, with no description, note, task or email. The agency is being waited on and nothing says what for
Application record	Same fields, "External Reference" = "Territory NOT ALLOWED"; "RP To Do : 0%" and "GSP To Do : 0%"	Requirement items can't be completed or linked to uploads
My Students	440 students; same large cards, about 6 per screen	No status column; no export; name not a link
My Enrolments	"266 In Process", "103 Acceptance", "9 Commenced", "154 Not Proceeding"; numbers on tracker dots are day counts (explained only on hover)	No Add Record, no export; "Acceptance" holds items at the Visa stage; "Deferred" with stage "Pre-Screening"; the in-process total shows as 266, 260 and 261 in three places
My Applications	858 applications	**The application created 15 minutes earlier can't be found**; no export
My Commission	"192 Estimate", "177 In Process", "8 Paid"	"Agency" column empty; amount only in the far-right "Ex GST" column after ~18 columns; "Days to Due Date" -448 unexplained; internal fields visible ("Is Exported", "Lock AUD", "Write Off", "SRP AUD", staff names); "Commission %" 70 with no base rate (implied 15%); course shown as "cid-mm-01-21799"; Documents tab doesn't open; no invoice; no export

Page	What the agency sees	Problems
Dashboard	Blank for ~8 s, then **"RP - Awaiting Action"**: Application Follow-Up, GTE Follow-up, COE Follow-up, VISA Follow-up, Enrolment Awaiting Submission, Expired Enrolment. **"RP Pipeline"**: pipeline by intake, cases awaiting response, **"RP To Do Case List" (207)**, **"GSP To Do Case List" (34)**, **"Awaiting Institution Case List" (24)**	Badges disagree with their lists (31 vs 34, 61 vs 63); "Enrolment Awaiting Submission" 0 despite an incomplete enrolment; "CY App Submitted by Status" fails ("Cannot generate chart at the moment."); truncated column headers; a "Test ui" dashboard visible to agencies
My To Do ("MY CASE")	Only 1 item: the internal commission-error case	The agency's 207 real to-dos are missing because GSP staff own those cases
My Inbox	Inbox and Sent both empty; no compose button	No email channel with GSP in the portal; case Email menu is an empty pop-over
My Events	Empty week calendar	"Week" button cut off
Institutions	Same 1,013 institutions	No app counts or commission %; records not tested
Channel Partners (own agency)	One card with counts and onboarding tracker; record with "Commission %" 70, GST %, stage "Registered", status "Approved"	**GSP staff's internal notes about the agency are visible to the agency**; this is the only place the agency sees its own rate
Contact List	Tabs Student, RP, Institution, Institution Partner	Student tab empty despite 440 students
OSHC Policies	1 policy; toolbar with **CSV export**	Export exists here but nowhere useful

Page	What the agency sees	Problems
Accommodation, Health Cover, Contact Admission	Same as section 5	Same as section 5

6.3 Main flows for an agency

Flow	Path	Interactions	Notes
Find a course	Course Search → clear the default location → type → Search Courses → View search result	~6	With the default location, restricted courses vanish with no reason
Create student	Apply Now → Add New Student → 18 required fields	~45	Own agency and branch not prefilled
Create enrolment	7 required, 4 prefilled	~10	Wrong year prefilled
Create application	Agree to warning → edit pencil → date → type → Update → Confirm & Create	~12	Internal commission error shown
Upload a document	Drop file → category → sub category → Upload → Finish	~6	No checklist
Find what to do next	Dashboard → gear → dropdown → "RP Pipeline" → scroll to "RP To Do Case List"	~5, plus 8 s load	"My To Do" shows the wrong list
See why a case waits on you	Enrolments → record → Cases → case → "Case Status"	~5	"Awaiting RP" with no reason
Check commission	My Commission → scroll ~18 columns → item → transaction	~4, plus scrolling	No invoice; no base rate

Course to finished wizard: about 80 interactions, as for GSP staff, plus about 6 to pick the agency's own partner and branch.

6.4 Top 15 UX problems for an agency

1. The real to-do list ("RP To Do Case List", 207 items) is hidden in Dashboard → gear → "RP Pipeline"; "My To Do" shows 1 internal case.
2. "Awaiting RP" never says what is awaited (a VISA case has waited since Oct 2024 with nothing in it), and it isn't shown on lists or record headers.
3. The application just created can't be found in My Applications.
4. Territory restrictions are silent (courses vanish) or late (found only in the wizard).
5. The student form ignores what the system knows: own agency and branch not prefilled, counsellor listed twice, 18 required fields, date of birth 7 clicks.
6. Internal content is shown to agencies: the commission-error message and case, staff notes about the agency, fields like "Is Exported" and "Write Off", a "Test ui" dashboard.
7. No way to talk to GSP about a student except a note: empty inbox, no compose, Contact Admission not linked, notes not private and without replies, "Mention" lists every staff member with no role.
8. Commission is unclear: 70% with no base rate, amount buried at the far right, "Days to Due Date" -448, course codes, no invoice.
9. Dashboard counts disagree with their lists, and one chart fails to load.
10. The same total shows as 266, 260 and 261.
11. No document checklist; "RP To Do" requirement items are text only and can't be completed.
12. Shortlist hearts and "Apply" in results don't work, so applying to several courses from search is impossible.
13. Tracker day counts have no labels, and bucket names don't match stages.
14. No export for students, enrolments, applications or commission (only OSHC has CSV).
15. Weak validation: expired passport accepted, unanswered question saved as Yes, dropdown search keeps stale text.

6.5 Broken with the agency login

#	What was done	What happened
1	Searched for the new application	"No Record Found"

#	What was done	What happened
2	Opened "RP Pipeline"	"CY App Submitted by Status": "Cannot generate chart at the moment."
3	Compared dashboard badges and lists	31 vs 34; 61 vs 63; 0 awaiting submission despite one
4	Clicked shortlist hearts	Counter 0; "Apply" stays grey
5	Clicked "$" on a result	"No matched commission item"
6	Skipped the work question	Saved as "Yes"
7	Reopened a searchable dropdown	Old text kept, then "No Record Found"
8	Created one application	"Successful Created Multiple Applications." plus internal commission failure
9	Opened Email in a case	Empty pop-over
10	Opened Contact List → Student	"No Record Found." despite 440 students
11	Clicked Documents on a transaction item	Tab didn't switch
12	First Dashboard load	Blank for ~8 s
13	Phone width (~407 px)	Enrolment bucket tabs disappear; dashboard columns cut to 1 to 2 letters

6.6 Missing for agencies

- A "who acts next" summary on every student, enrolment and application. The data exists in cases but isn't shown.
- One task inbox combining "RP To Do" cases, missing documents and expiring items.
- Two-way messaging with GSP per student, with visible replies and response times.
- Commission in plain terms: "you earn X (Y% of the university's commission)", payment date, overdue reasons, invoice download.
- Territory eligibility shown in search, saved shortlists, and applying to several courses at once.
- A document checklist per course, expiry tracking, and reuse across enrolments (not verified).

- Exports of the agency's own pipeline.
- **Not checked:** what a student sees after scanning the QR, deleting an enrolment, institution records, status-change notifications, email with GSP, GSP Academy, Internships.

6.7 Keep from the agency view

- **The "who acts next" data already exists:** "Awaiting RP" case statuses; "RP To Do", "GSP To Do" and "Awaiting Institution" case lists; "RP To Do %" and "GSP To Do %". GSP 3.0 should bring these to the front.
- **"RP - Awaiting Action" grouping** (Application, GTE, COE, VISA follow-up) matches how counsellors think.
- **Data scoping:** the agency sees only its own records.
- **Default student location** from the agency's country, with an explanation when it hides courses.
- **Status buckets with counts** on enrolments and commission.
- **Day counts on the tracker** (e.g. days from lodged to offer), with visible labels.
- **Student self-registration QR:** worth promoting.
- **Clear empty states** ("No Notification", "No Announcements").
- **The plain-language territory warning** with its time cost, moved into search.

7. COU - Counsellor Audit

A counsellor has two ways to start an application, and they use different forms and rules; neither tells the counsellor who acts next. This is the Claude in Chrome audit of the same staging portal, logged in as an agency counsellor, on 25 Oct 2026. It used the second way into the main flow (My Students → Add Record), not the course-search wizard. Screens that behave as in sections 5 and 6 are only described where they differ.

Login used: "Jovial Unilink" (jovial.lejo+COU@upgrad.com), User Type "Recruitment Partner", Permission Role "Counsellor". Agency "Unilink Global Solution", branch "Dhaka Office". Its display name is the same as the branch admin's, which is why the branch admin saw "Jovial Unilink" twice in the counsellor list.

Test data created: student 128813 "Test Student COU QA", enrolment E00102513 (CQUniversity Australia, Brisbane, Mar 2027), application A00175350 (Bachelor of Information Technology, 08-Mar-2027), one dummy PDF on the application. Nothing deleted or sent.

7.1 What a counsellor sees compared with other roles

Area	GSP admin	Branch admin (BOA)	Counsellor (COU)
Home tiles	15	15	**13** (no My Commission, no Institutions)
Students	84,092	440 (agency)	**Own only** (0 before the test)
Enrolment buckets	All	Agency	Own (1 / 0 / 0 / 0 after the test)
"$" commission icon in search	Shown	Shown	**Hidden**
"Commission %" on partner profile	Shown	Shown	**Hidden**
Agency-wide counts on Channel Partners	–	Shown	**Shown** (262 / 145 / 9 / 154)
GSP staff notes about the agency	–	Visible	**Visible**
Commission tab on enrolments	Yes	Yes	**No**
Dashboards	~230	3, incl. "Test ui"	Same 3, scoped to own records

Typing `/manage-commission-transaction` or `/manage-institutions` shows "Oops! Permission for this action is denied." on an empty page with no way back.

7.2 Page by page (differences from sections 5 and 6)

Page	What the counsellor sees	Problems
Home	13 tiles	No counts, tasks or alerts

Page	What the counsellor sees	Problems
My Students	Only own students; kebab with Add Record	Empty state shown twice ("No Record Found." and "No Records Found", "Showing 50 out of 0 items")
Add student (My Students → Add Record)	Same 44-field form, 18 required; success message "Successfully Created a Student."	Partner, branch and counsellor each have one option but none are prefilled (6 wasted clicks). **Duplicate email:** "Email already exists. Please try another email address." hides who owns the student and pushes a duplicate. **Future date of birth accepted** (10-Nov-2026). The work-experience bug only happens when the question is left unanswered
Student record	Tabs: Student, Documents, History, Cases, OSHC, Events; Enrolment, Notes, Contact	
Add enrolment (student → Enrolment panel → Add Record)	"Enrolment Details" with institution and campus to pick by hand; created at stage "New"	Institution search "CQU" also matched "Macquarie"; campus list shows names only; year prefilled 2026; no success message
Enrolment record	Tabs without Commission; watch, delete and edit icons	

Page	What the counsellor sees	Problems
Add application (enrolment → Applications → Add Record)	"Create Application": commencement date, application type, institution (prefilled with an internal ID, "73 - CQUniversity Australia"), campus, course, and **"Type of Student"** (New, Transfer, Progression), which the wizard doesn't have	Campus not carried over from the enrolment; course list shows names only, no fees, intakes or entry rules; free date picker; no territory warning for this institution. Success: "Primary Application is successfully created and it's Commission transactions are successfully created." **Then the page stays dimmed and frozen until reloaded**
Application record	Tabs: Application, Documents, Cases, History. Institution questions on recognition of prior learning, transfer from another Australian provider, and principal course	"Course Fee" 110160 AUD is a total here but was an annual fee (17950) for Abertay
"ASSESSMENT REQUIREMENT" (CQUniversity)	**"Application Required Documents"**: Passport; transcripts and completion certificates; English proof; statement of purpose; CV; employer reference, each "Pre-Lodgement Required". Other items "Pre-Payment Required", "Pre-Offer Required", "Pre-CoE Required"	The closest thing to a document checklist in the portal, but text only and not linked to uploads. Stale or wrong content: "Financial Covering letter - Srilanka" for a Bangladesh student; a rule about applications "not filed before 10 May 2024"

Page	What the counsellor sees	Problems
Documents	Upload from the application (Documents → Add Record); stored as type "Enrolment Course (Application)" and also shown on the enrolment	Documents can live at enrolment or application level, with no guidance on which
My Enrolments	"1 In Process", 0, 0, 0; badge "1/0"	No "$" button
My Applications	"No Record Found.", "out of 0 items"	**The new application is missing, for the third role in a row**
Course Search	Same form, "Bangladesh" prefilled; "CQUniversity" + "Information Technology" found 35 courses; no error pop-up; "$" hidden	Substring matching, not ranked by relevance; hearts and "Apply" do nothing; **"View in Institution" opens the university's public website**
My To Do	"No Record Found."	Counsellors own no cases; the new Offer case belongs to GSP
My Inbox	Empty; no compose	
Notifications	No badge after creating the application	The branch admin got a notification for the same action
Dashboard	Same 3 dashboards, own records. "RP - Awaiting Action": all 0. "RP Pipeline": **"GSP To Do Case List: 1"** (E00102513, Offer, Register, no assigned user)	"CY App Submitted by Status", "Pipeline by Intake" and "Cases Awaiting Response" show "Cannot generate chart at the moment." even with 1 application. "Waiting on GSP" shows here but not on the application

Page	What the counsellor sees	Problems
Channel Partners (own agency)	Agency-wide counts (260 / 145 / 9 / 154, or 262 on the record)	"Commission %" hidden, but **GSP staff notes about the agency are visible**
Contact List, OSHC Policies	Both "No Record Found."	Contact List ignores the counsellor's new student and emergency contact
Accommodation, Health Cover, Help, Events, Profile (incl. "Student QR")	Same as sections 5 and 6	

7.3 Main flows for a counsellor (non-wizard path)

Flow	Path	Interactions	Notes
Create student	My Students → kebab → Add Record → 18 required fields → Submit	~45	Three single-option pickers not prefilled; future birth date accepted
Create enrolment	Student → Enrolment panel → Add Record → 7 required, institution and campus by hand	~16	Starts at "New"; no institution or course guidance
Create application	Enrolment → Applications → Add Record → 6 required	~16	Campus not carried over; "Type of Student" only here; page frozen after success
Upload a document	Application → Documents → Add Record → file → category → sub category → Upload	~7	Stored at application level
See status or next step	Enrolments → record → Cases, or Dashboard → gear → "RP Pipeline"	~5	"Waiting on GSP" only in the dashboard
Commission	Not available	–	Tile hidden, page denied, "$" hidden

Total: about 84 interactions, against about 80 through the wizard. The effort is similar, but the two paths use **different forms and rules** (Type of Student, campus carry-over, success messages, document level).

7.4 Top 15 UX problems for a counsellor

1. The new application is missing from My Applications while My Enrolments shows it, now for all three roles.
2. The page stays dimmed and frozen after "Successfully Created Application" until reloaded.
3. Nothing on the record says who acts next; "GSP To Do Case List: 1" is only in the dashboard, and My To Do is empty.

4. The duplicate-email check hides the owner and pushes the counsellor to create a duplicate student.
5. Three required single-option pickers aren't prefilled, and the counsellor shares a display name with the branch admin.
6. The two ways to create an application use different forms (Type of Student, campus carry-over, territory warning).
7. Charts show errors instead of data even with 1 application.
8. Documents can be stored at enrolment or application level with no guidance, so the same passport may be needed twice.
9. The only document checklist (CQUniversity) is text, not linked to uploads, and partly stale or for the wrong country.
10. A future date of birth is accepted.
11. Feedback is inconsistent: a success message on one path, none on the other; no notification for the counsellor's own application.
12. Permission-denied pages are dead ends.
13. "View in Institution" opens the public website, not what its label says.
14. Counsellors see agency-wide counts and GSP staff notes, while their own lists are scoped to one person.
15. "Course Fee" means annual fee on one application and total fee on another.

7.5 Broken with the counsellor login

#	What was done	What happened
1	Clicked OK on "Successfully Created Application"	Grey overlay stayed; page unclickable until reload
2	Opened My Applications after creating A00175350	"No Record Found.", "out of 0 items"
3	Opened "RP Pipeline"	Three charts: "Cannot generate chart at the moment."
4	Opened My Students with no records	Two empty-state messages on one page
5	Picked a future date of birth	Saved (10-Nov-2026)
6	Created an application	No notification for this user

#	What was done	What happened
7	Contact List → Student	"No Record Found." despite a new student
8	Typed restricted page addresses	"Oops! Permission for this action is denied." with no way back

7.6 Missing for counsellors

- No commission at all, with no explanation. Whether counsellors should see it is a product decision.
- No institution profiles: entry requirements and territory rules only through course search.
- No personal task list of documents to upload or questions to answer.
- No way to reassign or claim a student found through the duplicate-email check.
- No export.
- **Not checked:** Live Capture, the QR self-registration flow, delete actions, later application stages, mobile for this role.

7.7 Keep from the counsellor view

- **Clear role scoping:** own students, enrolments and applications only; commission hidden in search, records and the partner profile.
- **Duplicate-email detection,** changed to show who owns the record.
- **Clear success messages** ("Successfully Created a Student.", "Successfully Created Application"), used on every path.
- **Institution-specific questions** (prior learning, transfer, principal course) and **CQUniversity's staged document checklist** (Pre-Lodgement, Pre-Payment, Pre-Offer, Pre-CoE). A strong model for GSP 3.0 once linked to uploads and progress.
- **Commission transactions created automatically** when institution data is complete.
- **"GSP To Do" vs "RP To Do" lists,** brought onto the student and application pages.

8. HOA - Head Office Admin Audit

The agency head can see every branch and manage branches and users, but no list or dashboard can show anything by branch, which is the main reason this role exists. This is the Claude in Chrome audit of the same staging portal, logged in as an agency Head Office Admin, on 25 Oct 2026. The student, enrolment and application forms were only opened to check the branch and counsellor pickers, then cancelled. Screens that behave as in sections 5 to 7 are only described where they differ.

Login used: "Jovial Unlink" (jovial.lejo+HOA@upgrad.com, surname misspelt against the agency name "Unilink"), User Type "Recruitment Partner", Permission Role "Head Office Admin", Job Title "HOA". Agency "Unilink Global Solution".

Test data: none created. Nothing deleted or edited; "Reset Password", "Add Record" (branch or user) and "Sync" not clicked.

8.1 All four roles compared

Area	GSP admin	Head Office Admin (HOA)	Branch admin (BOA)	Counsellor (COU)
Home tiles	15	15	15	13
Students	84,092	**445** (all branches)	440 (one branch)	Own only
Enrolments (In Process / Acceptance / Commenced / Not Proceeding)	All	**271** / 103 / 9 / 154	266 / 103 / 9 / 154	Own
Commission (Estimate / In Process / Paid)	All	**196** / 177 / 8	192 / 177 / 8	No access
Partner record tabs	Company, Branches, Company Profile, Document, History, Cases	**Same as GSP admin**	Company, Branches, History	Company, Branches, History

Area	GSP admin	Head Office Admin (HOA)	Branch admin (BOA)	Counsellor (COU)
Branch management	Yes	**Add branch; edit and delete branches; team list; add users**	No	No
Branch picker in the student form	Any agency	**3 branches**	1 branch	1 branch
Dashboards	~230	"RP - Awaiting Action", "RP Pipeline", "Test ui"	Same 3	Same 3, own records

8.2 Page by page (differences from sections 5 to 7)

Page	What the agency head sees	Problems
Home, profile	Same 15 tiles; profile has the "Student QR" tab	No counts or tasks; own surname stored as "Unlink"
My Students	445 students across all branches, including the Mumbai branch	**No branch column or branch filter**; the only clue is the branch BDM name
Student form (opened, then cancelled)	Same 44 fields, 18 required. "RP Branch" offers **"ABCDefg"**, "Dhaka Office", "Mumbai Office"; Mumbai counsellors "Rachana Kelgandre", "Rachana RP"	The single-option "Recruitment Partner" still isn't prefilled; **"ABCDefg" is a test branch** in a live picker. This is the only role where branch and counsellor are a real choice
My Enrolments	"271 In Process", "103 Acceptance", "9 Commenced", "154 Not Proceeding"; rows with "$"	No branch filter, no export

Page	What the agency head sees	Problems
Enrolment record	Tabs include **Commission**, which the counsellor who created the record can't see; commission line T00308429 (05-May-2027, due 04-Jun-2027)	
My Applications	Same grid	**Neither new application found**, 32 and 11 minutes after creation, so not a short delay
My Commission	"196 Estimate", "177 In Process", "8 Paid" (Estimate rose from 192 when the counsellor's application created commission automatically)	Same as BOA: "Agency" column empty, amount far right, internal fields, no export
New commission estimate (item T00308429, transaction C00262994)	Course fee 110160 AUD (total), Ex GST 3662.82, Days to Due 222, "Commission %" 70, status "Estimate"	**The calculation isn't explained.** 3662.82 equals the annual fee (36,720 AUD) × about 14.25% (implied university rate) × 70%. The head sees only 70%, the total fee and the result; not the university rate, which year is being paid, or why payment is due 05-May-2027
Channel Partners (own agency)	Same tabs as GSP admin: Company, Branches, Company Profile, Document, History, Cases; Notes, Contact	**"In process" shows as 260 (card), 262 (record) and 271 (Enrolments)**; GSP staff notes about the agency visible

Page	What the agency head sees	Problems
Branches tab	17706 "ABCDefg", 14918 "Dhaka Office", 17713 "Mumbai Office"; "Add Record"	
Branch record (`/rp-branches/view/{id}`)	Tabs Branch, History, **Team**; Notes, Contacts. Branch details (RP ID, branch ID, names, branch BDM) and address; **edit and delete icons**	A **different form layout** (labels to the left, two columns) from every other record page; delete sits beside edit with no warning of consequences
Team tab	Users with ID, name, role, email, branch, created date; "Add Record" for new users. Dhaka: the branch admin, the counsellor, and "Md Nazmul Hasan" (Head Office Admin, yopmail.com email)	**The HOA user being audited isn't listed** under any branch opened
User record	RP, branch, user ID, names, phones, job title, user type, status, role, "Activated", email, login name; **"Reset Password"**, edit, delete	A branch admin's page is titled **"Counsellor"**; User Type **"AGENT"** here but "Recruitment Partner" on the profile; **"Activated" unticked** while status says "Has Portal Access"
Institutions	Same as BOA: no app counts or commission %	
My To Do	1 item: an older internal "Error Creating Commission" case owned by "Jovial Unilink"	Can't tell which person owns it (three users display almost the same name); none of the agency's real to-dos

Page	What the agency head sees	Problems
Dashboard	Same as BOA (Application Follow-Up 31 of 34, GTE 61 of 63, COE 11, VISA 13)	**Every row is "Dhaka Office"; no branch filter or breakdown**; slow-loading widgets
Inbox, Events, Accommodation, Health Cover, Contact List, OSHC	Same as BOA	

8.3 Main flows for an agency head

Flow	Path	Interactions	Notes
Create student	My Students → Add Record → 18 required fields	~45	Choose partner (1 option), branch (3, incl. test "ABCDefg") and counsellor
See pipeline by branch	Not possible	–	No branch column or filter anywhere
See agency commission	My Commission → item → transaction	~4, plus scrolling	Only "Commission %" 70; estimate unexplained
Manage branches	Channel Partners → own record → Branches → branch	~4	Add, edit and delete available
Manage users	… → branch → Team → user	~5	Add user, reset password, edit, delete; contradictory labels
Find a new application	My Applications → search ID	2	"No Record Found"

8.4 Top 15 UX problems for an agency head

1. No branch view anywhere: lists and dashboards have no branch column, filter or comparison.

2. New applications can't be found in My Applications, even 32 minutes later, for all four roles.
3. Three different totals for the same thing (260, 262, 271 in process).
4. Commission estimates aren't explained: no university rate, no year being paid, no reason for the payment date; amount far right; no export.
5. People can't be told apart: three users show as "Jovial Unilink" or "Jovial Unlink" in case owners and pickers.
6. User admin labels contradict each other ("Counsellor" title for a branch admin, "AGENT" vs "Recruitment Partner", "Activated" unticked with portal access).
7. Delete sits next to edit on branch and user records with no explanation of consequences.
8. Test data in live screens: branch "ABCDefg" and the "Test ui" dashboard.
9. My To Do shows an internal commission-error case, not the agency's real to-dos.
10. "Waiting on the agency" is still hidden in the dashboard and inside cases, with no branch roll-up.
11. The single-option "Recruitment Partner" picker isn't prefilled.
12. Branch and user pages use a different form layout from every other record.
13. No export of students, enrolments, applications or commission for head-office reporting.
14. GSP staff's internal notes about the agency are visible.
15. Dashboard widgets load slowly and their counts disagree with their lists.

8.5 Broken with the head office login

#	What was done	What happened
1	Searched for A00175349 and A00175350	"No Record Found." 32 and 11 minutes after creation
2	Compared "in process" counts	260 (card), 262 (record), 271 (Enrolments)
3	Opened a branch admin's user record	Titled "Counsellor"; User Type "AGENT"; "Activated" unticked despite portal access
4	Compared dashboard badges and lists	31 vs 34; 61 vs 63
5	Opened the branch picker	Test branch "ABCDefg" listed

#	What was done	What happened
6	Checked own profile	Surname "Unlink"

8.6 Missing for agency heads

- Branch-level reporting: pipeline by branch, counsellor performance, commission split by branch.
- A team overview: all users across branches in one list, with role and activation status.
- A commission statement: university rate × agency share, payment schedule, invoices, export.
- Reassigning students or enrolments between counsellors or branches: no control found.
- **Not tested:** adding branches or users, resetting passwords, deleting, the Company Profile, Document and Cases tabs, mobile layout.

8.7 Keep from the head office view

- **Correct scope:** the head sees every branch's students, enrolments and commission.
- **The branch and team structure already exists** (branches, team list, a role per user); GSP 3.0 can build the head-office view on it.
- **Commission estimates created automatically** when university data is complete, with a due date and days-to-due.
- **A real branch and counsellor choice** in the student form for multi-branch agencies.
- **Status buckets with counts** on enrolments and commission.

9. ApplyBoard - Competitor Audit

ApplyBoard gets from a new student to a created application in about 25 interactions and 8 required fields, against about 80 and 27 in GSP today. It doesn't ask for less data overall; it defers everything not needed for eligibility, fills fields from documents, and lets the student complete their own profile. This is a read-only Claude in Chrome audit of the ApplyBoard partner portal (app.applyboard.com/agent) on 25 Oct 2026. Nothing was saved, submitted, uploaded, paid or sent; students are shown as [student] and the agency isn't named.

9.1 Navigation map

Header: Home on the left; bell (opens a full "Important updates" page), Elevate badge and avatar menu (My Account, Logout) on the right. A banner on most pages: "You have 69 important updates".

Left menu item	Address	What it is
Home	/agent	Dashboard
Programs & Schools	/search	Course search, filters, eligibility, compare
Students	/students	Student grid, then profile with tabs
Applications	/applications	Application grid, then application page
My Tasks	/tasks	Task cards across all applications
Payments	/agents/{id}/payments	Purchases and the commission ledger
Wish Lists	/wishlist	Program shortlists per student
360 Solutions	/360-solutions	GIC, loans, language tests, visa (cross-sell)
Invite Students	/invite-students	Intake form, QR code, embeddable search, student portal
TrainHub	/trainhub	Training courses
Offers Dashboard	/agent/offers	Fee waivers, bonus commissions, offers by country

Other pages: program detail (/schools/{school}/programs/{program}), a shareable comparison (/search/compare/{token}), My Account with 5 tabs, and Elevate. Programs, students, applications, comparisons and tasks all open in **new browser tabs**, so agents end up with many tabs.

9.2 Flow by flow

Home. Two pop-ups block work on load: a school promotion and a WhatsApp opt-in. Then: "Welcome" with "+ Add new student"; KPI cards (18 Tasks, 18 Applications, 4 Accepted, 0 Rejected, 15 Students) that link into work; the Elevate tier card ("Gold", 75% commission, points to the next tier); links to TrainHub, the signed agreement and the commission table;

a named account manager with email and phone, live chat and WhatsApp; academic and visa tools; an 8-step onboarding checklist; and a task matrix by intake and priority that shows zeros despite 18 tasks. Most of the page is marketing, not "what needs me today".

Course search and eligibility.

- **Inputs:** a keyword box ("What would you like to study?"), destination and institution, quick filters (Prime, Instant Submission, Exclude Pathway Programs, PGWP, Scholarships Available), saved filters, and **Smart filters (AI)**. Empty state: "Apply at least one filter above to search for programs." About 10 s to load.
- **Typos:** the keyword box and institution list don't tolerate typos ("computr scince" finds nothing, but the no-results message gives three plain reasons). **Smart filters do:** "masters in data scince in UK, tution under 20k, sept 2027" became 5 removable chips (United Kingdom, September 2027, Master's Degree, Data Science, tuition 10,001 to 20,000) with thumbs up or down.
- **Results:** sort by best match (success score), tuition, application fee or **Commission**. A "Show commissions" setting is **off by default**, so the screen is safe to share with a student.
- **Program card:** badges (Instant Submission, Instant Offer), tags (High Job Demand, No Visa Cap, Prime, Fast Acceptance, Scholarships Available…), location, first-year tuition, application fee, duration, available intakes, "Create application", and **"Success chance: High"** with a breakdown (acceptance rate, turnaround, popularity, rank, instant submission, PGWP, job demand), labelled as guidance only.
- **Advanced filters:** level, intakes, **study gap (years)** and **backlogs (failed courses)**, which match Indian applicants, plus duration, field, tuition, language, intake status, PGWP-only and more.
- **Eligibility filters:** for an existing student, or **a guest with no profile**, needing only 1 required field (study permit or visa) of about 7.
- **Compare:** tick at least 2 programs, then a new tab with "Share link", "Share Excel over email" and "Download". Problems: "Unknown" and past deadlines not flagged, placeholder test scores, unformatted tuition.
- **Program page:** overview, job insights, admission requirements with a **"Convert grades"** tool, scholarships ("Auto applied: Yes"), similar programs, intakes marked "Open" or "Likely open", and a **commission box** ("15.00% of Net (Base) Tuition", up to 2 instalments, link to the commission table).
- **Wish list:** shortlists belong to a student, not to the agent.

Add a student. One modal: **6 required of 15 fields, about 11 interactions.** Required: first name, last name, date of birth, country of citizenship, student email, consent. Optional: middle name, passport number and expiry, gender, phone, and lead fields (status, referral source, country and services of interest). **"Autofill with passport"** fills the personal section from an upload. Bulk import by CSV (50 at a time, assign to a team member). Errors show inline ("Please enter a first name", "Email is invalid"), but the date mask silently rejects DD/MM, and Cancel loses typed data without asking. The students grid has no status, application count or owner column.

Student profile. The rest of the data (about 34 required labels across about 59 inputs) lives here, with a section progress strip (Personal ✓, Education ⚠, Test Scores ⚠, Additional). It can be filled by the **"Smart Document Vault"** (passport → personal details, transcripts → education, test reports → scores; other documents stored for reuse), by **WhatsApp document upload**, or by **"Invite student to complete profile"**. "Reassign staff member" sets the owner. An AI nudge suggests safer programs when success looks low.

Start an application. One modal with a context card (program, school, student, intake, deadline) always in view:

Step	What's on screen	Required
1. Eligibility	Pick a student. If ineligible: "Unfortunately, this student is not eligible… The student has not provided an english score" with "Update profile data"; Next disabled	1
2. Intakes	"Jan 2027 · Open", "May 2027 · Likely open", with the deadline	1
3. Prerequisites	7 school rules, with the warning that the application will be cancelled if they aren't met	0
4. Backups	Up to 10 backup programs in order, with "Only similar programs"	0
5. What to Expect	The document list for this school, then "Create application"	0

About 11 interactions and **0 typed fields**; fees are paid after creation. Defects: a raw " {School}" token in titles, the main program offered as its own backup, and the program page saying English can come later while eligibility blocked for it.

Application page.

- **Header:** school, program, App ID, "Main selected intake: January 2027, Open" (tooltip: "ApplyBoard will submit your application once all required documents are provided."), Manage App, Share access, WhatsApp alerts.
- **Tracker:** Application created → Application Started → Application Reviewed (By ApplyBoard) → Submitted to School → Awaiting School Decision → Admission Processing → Pre-Arrival → Arrival. No dates.
- **"What to do" banner: "Review on hold - Provide missing information to proceed"** with "Complete Now" (on this record it contradicted the tracker).
- **Side panel:** submission deadline, "Success score: Low 1%", application details, exams, payment with receipt.
- **Requirements tab (the to-do list):** chips All · Pending · Approved · Rejected · In Review; groups "Pending (5)", "Approved (8)"; each item shows the school's own instruction and an **"Upload"** button (about 3 interactions, no category picking). Optional items say **"Optional now, required later"**.
- **Student records tab:** a timestamped timeline, including **"Application Package Submission Proof"** (screenshots, PDF, receipt).
- **Notes tab:** an **AI "Notes Summary"** split into **"Student / Applicant Needs To"** and **"ApplyBoard / Institution Needs To"**, with Translate and Regenerate (it was out of date on this record). Notes come from named staff; replies only by "Create note" or live chat.
- **Commission tab:** "Effective commission rate: 75%", "Final estimated commission: 15.00% of net (base) tuition fee", up to 3 instalments, eligibility status, rate history. No money amount.
- **Share access:** gives the student their own access without commission or notes; can't be revoked.
- **Owner:** no ApplyBoard person is named as owner; staff appear only as note authors.

Applications list. Columns: payment date, IDs, apply date, names, program, school, start date, partner, **Status** (Submitted, Not Paid, Cancelled, Accepted…), **Requirements** (four coloured counts with no legend: missing, reviewing, not approved, complete) and **Current stage** (Pre-Payment, Pre-Submission, Submission, Post-Submission, Admission). Filters by country, payment and status. No export, bulk actions, intake, owner, commission or next-action column.

My Tasks. "You have 18 uncompleted tasks"; filters for intake, due date, application, stage, student, school, country and **assignee**; task types (requirements, at-risk apps, GIC and loan offers). **"Hide overdue tasks" is on by default**, and every task said "Due date coming soon". Large cards, no sort or bulk actions.

Commission, payments and Elevate.

- **Balances:** "Commissions" (withdrawable) and "ApplyCredits" (spend only).
- **Ledger:** credits and debits by type (earned, bonus, adjustment, deduction, advance, withdrawal…). No expected or pipeline commission.
- **Rates:** on the program page (gross, e.g. 15%), in the commission table (agent's net share, e.g. 11.25%), and on each application.
- **Elevate tiers:** Gold 75%, Platinum 80%, Titanium 85% base commission, plus faster processing and support at higher tiers; points per student "Committed to enroll" (10 for India, Nigeria and others, 20 for other nationalities). The formula is fully visible: **agent payout = tier % × school rate, in up to 2 or 3 instalments.**
- **Offers dashboard:** fee waivers and per-student bonuses by destination.

Notifications. The bell opens a full page with a "Notes" tab (67, oldest first by default) and an "Application Status" tab showing current and previous status. **Notification preferences per type:** new or rejected requirement, deadline in 24 hours and 7 days, at-risk applications, tuition-deposit reminders (7, 3 and 1 days), notes, commission events; each Immediate, Daily or off, with WhatsApp as a channel.

Team and account. Staff invite by name and email (no role picker), with Profile and Payment permissions; owners set by "Reassign staff member", bulk-import assignment and task assignee.

TrainHub and invites. TrainHub courses with progress (basics, compliance, institution training); feature announcements as banners; Invite Students with an intake form, QR code, embed code and student portal.

Mobile. The application page and search adapt well; the menu drawer doesn't close after choosing; the applications list is a squeezed desktop grid; the chatbot covers buttons.

9.3 ApplyBoard vs GSP today

Flow	ApplyBoard	GSP today
Search and open a program	~3 interactions, 1 keyword	~8 interactions, 2 of 17 inputs

Flow	ApplyBoard	GSP today
Eligibility check	Built into the application, or 1 required field as a guest	Not available
Add a student	1 modal, 6 of 15 required, ~11 interactions	1 long form, 18 of ~44 required, ~46 interactions
Start an application (student exists)	1 modal, 5 steps, 2 required, ~11 interactions	Enrolment and application steps, ~9 required, ~21 interactions
New student to created application	**~25 interactions, 8 required**	**~80 interactions, ~27 required**
Complete the profile	~34 of ~59 later, by autofill, WhatsApp or the student	All upfront
Upload a requested document	From the requirement row, ~3 interactions	Documents tab with category and sub category, ~7
See what's missing	Requirements tab, open by default	Not shown
See commission for an application	Commission tab, ~3 clicks	4 clicks through transactions; hidden from counsellors
Compare and share programs	~5 interactions, link or Excel	Not available

9.4 Status and ownership wording (exact)

- **Tracker:** "Application created" → "Application Started" → "Application Reviewed (By ApplyBoard)" → "Submitted to School" → "Awaiting School Decision" → "Admission Processing" → "Pre-Arrival" → "Arrival"
- **List stage:** "Pre-Payment" · "Pre-Submission" · "Submission" · "Post-Submission" · "Admission"
- **List status:** "Not Paid" · "Submitted" · "Cancelled" · "Accepted" · "Rejected" · "Withdrawn" · "Refund In Progress" · "Program Closed" · "Deferral In Progress" · "Waitlisted" · "Ready to Enroll" · "Enrollment Confirmed"
- **Requirements:** "Pending" · "Approved" · "Rejected" · "In Review"; list filter "Missing" · "Reviewing" · "Reviewing - None Outstanding" · "Not Approved" · "Complete"; "Optional now, required later"

- **Who acts next:** "Review on hold - Provide missing information to proceed" + "Complete Now"; "ApplyBoard will submit your application once all required documents are provided."; "Student / Applicant Needs To:" / "ApplyBoard / Institution Needs To:"; "If this information is incorrect, please update the student's profile data in order to apply."
- **Timing:** "Open" / "Likely open"; "Submission deadline: Jan 2, 2027"; "Due date coming soon"; "Deadline in 24 hours" / "Deadline in 7 days"
- **Risk:** "Success chance: High"; "Success score: Low 1%"; "Our AI suggests that your success with [program] could be low or medium…"

9.5 Top 15 things to learn from

1. **Split data entry:** 6 required fields to create a student and 2 to start an application; everything else later.
2. **Eligibility inside the application, with the exact reason** and a link to fix it.
3. **The requirement checklist is the to-do list,** with one-click Upload per item and no categories to pick.
4. **Document autofill** (passport, Smart Document Vault, WhatsApp upload).
5. **Hand the profile to the student** ("Invite student to complete profile", Share access) while commission and notes stay private.
6. **A next-action banner** at the top of the application.
7. **AI Smart filters** that turn one typo-filled sentence into removable filter chips.
8. **School rules, deadline, intake status and document list shown before creating** the application.
9. **AI notes summary split by who needs to act,** with Translate.
10. **Commission visible when deciding:** sort by commission, a hide-commission switch for screen-sharing, rates on programs and applications, and a clear tier formula.
11. **Guest eligibility search** for walk-ins, with 1 required field.
12. **Compare and share** by link or Excel.
13. **"Optional now, required later"** labels.
14. **Submission proof** and timestamped records.
15. **Per-type notification control,** including WhatsApp, deadline and deposit reminders.

9.6 Top 10 weaknesses to avoid

1. Due dates don't really exist ("Due date coming soon" on all 18 tasks), and overdue tasks are hidden by default.

2. Signals contradict each other on one application (tracker vs banner vs out-of-date AI summary).
3. No ApplyBoard owner named on the application.
4. Requirement count circles in the list have no legend.
5. Commission framed two ways (gross vs agent-net), no money estimate and no pipeline view.
6. Marketing interrupts work: pop-ups, loan and GIC cards, a loan listed as a requirement.
7. Lists and tasks are weak for volume: no export, bulk actions or task sort; oldest-first notifications.
8. Search is only typo-tolerant in the AI box, and slow to load.
9. Data quality gaps: DD/MM rejected silently, no discard warning, template tokens and raw markdown on screen.
10. Too many new tabs and long legal blocks in the application steps.

9.7 What couldn't be checked

Saving a student and duplicate detection; passport autofill accuracy; bulk import; the final "Create application" and fee payment; document upload, rejection and re-upload; notes, live chat and replies; the student's shared access; withdrawals and invoices; instalments and real payouts; saved filters and display settings; WhatsApp setup; notification changes; staff invites and roles; regenerating the AI summary; due-date calculation; wish list contents; 360 Solutions, GIC and loans; Job Insights and Convert grades; accessibility. All would have written data, notified someone, or were out of scope.

10. Branding and logo options

The upGrad brand guidelines are the starting reference for GSP 3.0's look, but they are not a limit: the team can explore options beyond them. Three logo options are on the table so far.

Brand reference: upGrad brand guidelines. Use it for upGrad red, type and tone; explore beyond it where the product needs something the guidelines don't cover.

Logo options

Option 1: colour lockup. A mark of two speech bubbles (red to violet, and violet to cyan), "upGrad" in upGrad red, a grey dot, "GSP" in the violet-to-cyan gradient, and "GLOBAL STUDY PARTNERS" in widely spaced dark capitals underneath.

Option 2: dark lockup. The same bubble mark and layout, with "upGrad · GSP" and the subline in dark slate. Calmer, and easier to use on busy or tinted backgrounds.

Option 3: stacked wordmark. "upGrad" in red over "GSP" in the magenta-violet-cyan gradient, no mark or subline. Suited to app icons, splash screens and square spaces.

Notes for design

- **The bubble mark** reads as conversation and partnership, which fits a platform built around agencies, GSP and universities talking to each other.
- **The gradient includes violet,** which the brief already uses as GSP's owner colour (amber = agency, violet = GSP, blue = university). This can tie the brand to the product, but the owner colours must stay readable as status colours, so keep the gradient to the logo and brand moments, not status chips.
- **These are raster images** with some soft edges; the chosen option should be redrawn as a vector (SVG) with exact colour values before it goes into the product.
- **Variants still needed:** a mark-only version for the sidebar and favicon, a white version for dark backgrounds, and minimum sizes.

11. Notes for Claude Code

Claude Code can't open claude.ai links, because they need a signed-in account, so every reference should also live as a file in the project repository. The links in section 1 stay the source of truth for people.

Put these files in the repo

File in the repo	How to get it
`references/prototype/gsp-partner-portal.html`	The prototype's own file, downloadable from the chat where this doc was made
`references/docs/brief-explained.md`	Open "upGrad GSP: The Brief, Explained Simply" → click its name → Export → Markdown
`references/docs/field-research-explained.md`	Same, from "What Our Agents Told Us: Explained Simply"
`references/docs/product-designs-and-references.md`	Same, from this doc
`references/docs/designer-brief.md`	Export from the GSP 3.0 Designer Brief, once it is shared with this account
`references/field-report/`	The field report page and its screenshots, if a copy is needed offline

The original audit files, `GSP_legacy_portal_UX_audit.md` (GSP staff) and `GSP_legacy_portal_UX_audit_BOA_agency_view.md` (BOA - Recruitment Partner Audit) and GSP_legacy_portal_UX_audit_COU_counsellor_view.md (COU - Counsellor Audit) and GSP_legacy_portal_UX_audit_HOA_RP_head_view.md (HOA - Head Office Admin Audit), should also go in the repo under `references/audits/`; they have every exact on-screen message.

The competitor audit, `ApplyBoard_agent_portal_competitor_audit.md` (ApplyBoard - Competitor Audit), should go under `references/competitors/`.

The three logo options should go under `references/brand/` (`logo-option-1-colour-lockup.png`, `logo-option-2-dark-lockup.png`, `logo-option-3-stacked-wordmark.png`), with the brand guidelines link noted in the repo's README.

Reading the prototype

- Open `gsp-partner-portal.html` in a browser; it needs no server. Claude Code can also open it with a headless browser and switch logins through the `#as` select.
- The parts of its code that define the product, useful as a spec:

  - `ROLES`: each login's menu and home screen.
  - `ST`: every application status, with its stage (0 to 7), owner (you, gsp, uni) and agency wording.
  - `NEXT`: the order statuses move in.
  - `NEEDS`: what the agency must do at each status.
  - `SU_DOCS` and `DOCRULES`: sign-up documents by country.
  - `BDM_RULE` and `ADM_SPOC`: how a new agency gets its BDM and Admissions contact.
- Treat it as a **behaviour reference only**. Colours, type and layout come from the upGrad brand guidelines and our own designs, not from the prototype.

Order of truth when references disagree

1. The GSP 3.0 Designer Brief.
2. Our design decisions, recorded in our docs.
3. The field report, for the problems and evidence behind them.
4. The prototype, for how a flow behaves.
